

KLARAVEX LLC — INVESTOR DECK

AI-first managed IT & security for US businesses

89% of issues resolved by AI instantly, 24/7. The 11% that need judgment get a senior engineer in under two hours.

The problem with IT support

Small US businesses pay \$150–300/hr for reactive IT that overpromises and underdelivers. Security gaps cost them millions in breaches.

Why now

AI can automate 89% of routine IT work instantly. Senior engineers focus on the 11% that matters — security, architecture, compliance.

One engine, two surfaces

Klaravex runs on a single AI-powered operations platform serving both B2B businesses and B2C consumers.

Moat: The company runs on its own product

Klaravex's entire operations, sales, and support run on the same platform it sells — ensuring constant product-market fit.

Go-to-market

Targeting law, accounting, and medical SMBs with free security assessments and transparent pricing.

Traction

[PLACEHOLDER — Pull real numbers from scorecards. No fabrication.]

The team

Founder with 15+ years in enterprise IT and security. Senior engineering team with cloud and AI expertise.
