

INTERNAL

INTERNAL — KLARAVEX GROWTH OS

The strangler-fig rebuild

A parallel product tree that takes over revenue generation stream by stream while the monolith serves.

INTERNAL

Why a second tree

The legacy monolith works but limits growth cadence. Growth OS runs independently on systemd timers.

Growth OS layers

INTERNAL

Four-layer architecture diagram

INTERNAL

Migration strategy

Shadow → cutover per stream. Live monolith remains production until each stream is verified.
